

Associate Consultant Opportunities

CRA is a Holistic Operational Risk Consultancy offering a broad range of services to the Defence, Nuclear and Finance sectors. Innovators in the world of risk, CRA are focussed on the integration of Human Factors, Human Reliability, Probabilistic Safety Assessments, Safety Case and Advanced Risk Analysis. We are currently expanding and are looking to grow our team of Associates to support work for clients in the UK, France, China, Korea and Japan.

We're looking for experienced Human Factors consultants to undertake projects on an Associate Consultant basis. As a Consultant you will need good personal and technical skills combined with extensive client facing experience. Responsibilities will span technical work and project management, with business development opportunities available to demonstrate your creative abilities.

Ideally your technical background will include expertise in:

- Human Performance, particularly Human Reliability Analysis
- Human Factors Integration – HFIP development, implementation and review
- Human Factors experience spanning feasibility, design, construction or decommissioning.

Human Factors experience in the following areas is of particular interest:

- Cyber security
- Human Factors Integration process and planning
- The range of Human Factors technical activities spanning design, development and assessment.

We are looking for established consultants ideally with:

- 10 to 15 years of successful HF project delivery
- Registered or Chartered status with a recognised professional body, or willing to work towards this within 6 months
- Experience in a range of industry sectors including nuclear.

As thought leaders in Risk Management, CRA encourages innovation to develop new services, products and services.
