

## CHIEF CONSULTANT - SAFETY CASE SERVICE LEAD

### CATEGORY:

Nuclear

### TYPE:

Chief Consultant, Permanent, Full Time

### LOCATION:

Gloucester ideally (Warrington, Glasgow and London also considered)

### SALARY:

Attractive remuneration package

### GENERAL DESCRIPTION:

- CRA has rapidly grown its safety case service over the past couple of years and there is now a requirement for a full time Service Lead to coordinate and further grow this side of the CRA business.
- CRA is seeking to employ a Chief Consultant to continue to lead the development and delivery of consultancy to the UK Nuclear Safety market.
- As an industry-respected professional with significant experience, you will be able to demonstrate a proven track record in Safety Case and developing and leading teams undertaking safety case projects.
- You will be passionate about growth in terms of: leading industry thinking in your specialist area; providing expert advice; and support to internal and external stakeholders.
- Following a handover from the existing Service Lead for Nuclear Safety Case, the successful candidate will report directly to the Managing Director of CRA. The successful candidate will work strategically and in unison with the CRA Business Development Manager.
- The successful candidate will manage the existing service as well as identifying and developing new business opportunities associated with the UK safety case market. They will be expected to manage key client relationships while ensuring clients receive the highest quality of service.
- CRA's culture has three values at its core; Quality, Integrity and Leadership. You will be expected to espouse CRA's values at all times.

### QUALIFICATIONS:

- Degree qualified (Bachelors, Masters, Doctorate), or equivalent, in a relevant subject
- Chartered in a relevant institution, or equivalent level of professional standing
- Security Clearance (BPSS and CTC) or ability to obtain appropriate clearance

### EXPERIENCE:

- Extensive technical experience on UK safety case projects
- Proven Safety Case management experience with a consultancy background or within a client organisation
- Comfortable working as part of an integrated multidisciplinary team

- Significant involvement in the delivery of Safety Cases in Civil Nuclear Power or Decommissioning & Radwaste Management or Defence
- Recognised ability to work and lead across multiple projects
- Experience of business development, including working collaboratively with customers
- Experience of interacting with the regulator
- Strong interpersonal skills

### **CORE SKILLS AND KNOWLEDGE:**

- Comprehensive knowledge of UK market for Safety Case Services and the ability to successfully judge future needs of the Safety Case market and develop strategies to respond to the market.
- Have a strong network in the industry and have a natural penchant for building relationships with existing and new customers.
- Ability to build, develop and lead a team of Safety Case Engineers using both retraining of existing staff and recruitment to fill key roles to supplement the existing team.
- Must be able to demonstrate leadership and management of the development of complex safety cases.
- Demonstrated ability to manage internal and external stakeholders at various levels and to nurture client relationships.
- Thorough understanding of current industry best practice, safety regulations and safety assurance through the market.

### **KEY ATTRIBUTES:**

- Inspirational, both technically and personally
- Enthusiasm to develop the careers of others in a consultancy environment
- Significant professional network in the UK with potential to bring in new opportunities for CRA
- Excellent written and oral communication skills
- Exceptional problem solving ability
- High level of IT proficiency, computer literacy, MS Office Suite
- Ability to think logically and creatively within the confines of the accepted boundaries of Nuclear Safety Case
- Highly developed report writing and presentation skills

### **DESIRABLE:**

- Good project management experience
- Proposal writing
- Technical Sales ability, being able to identify and develop prospects with the customer

Please send CV and covering letter to Charlie Boyle (cboyle@crarisk.com). Closing date: 15 January 2019
